paigehcarroll@gmail.com ▪ Austin, Texas ▪ (210)913-7789 ▪ [LinkedIn](#) ▪ [GitHub](#) [Portfolio](#)

Adaptable full stack web developer with a foundation in delivering exceptional customer service, precisely managing data, and maintaining accurate records in dynamic environments. Proficient in HTML, CSS, JavaScript, and React, with knowledge in application development, database design, and Object-Oriented Programming. Experience demonstrates a strong aptitude for creative problem-solving, adaptability, and meticulous attention to detail. Seeking a dynamic team to enhance technical proficiency, tackle challenging problems, and foster creativity in a nurturing environment.

Projects

Smart Shopping List | the-collab-lab/tcl-73-smart-shopping-list | https://tcl-73-smart-shopping-list.web.app/
- A "smart" shopping list that learns shopping habits over time, organizing lists by what is most likely to be bought next
- Apprenticeship for gaining practical experience by working remotely with other developers under the guidance of mentors; developed skills in remote pair-programming, using Github, git flows and weekly meetings to update team on status of project
- Tools/Languages: React, JavaScript, NodeJs, Firebase

Collect Connect | collectors-connect | https://boiling-anchorage-11027-d19406c04dfb.herokuapp.com/
- Collectors can share their collections to a personal account and view collections shared by other users
- Collaborative project created utilizing the MERN stack. Managed team collaboration and workflow, assisted with backend construction and queries, designed react components and handled styling
- Tools/Languages: React, JavaScript, NodeJs, ExpressJs, MongoDB, Apollo with GraphQL, AWS S3

BookQuesters | bookquesters | https://sillytsundere.github.io/bookquesters/
- User's can search for books and save them to lists persisted in local storage
- Assigned tasks to group members and checked that standards for completion were being met throughout the project. Utilized API libraries in conjunction with front end languages to create an application with streamlined functionality and a sleek appearance in a collaborative setting
- Tools/Languages: HTML5, CSS, JavaScript, Bootstrap, TailwindCSS, Google Books API, Open Library API

Education

Full Stack Web Development Certificate, University of Texas, *Austin, TX*   *June-November 2023*
